What Got You Into American Cup Cars? My dad had raced various formulas from the late 80s up until recently, and I had spend a lot of time watching and helping him, as well as helping out with a BriSCA F1 team. When my dad decided to retire, it was time for me to take up the driving.

The car was imported from Indiana USA in 2020 and we raced a couple of meetings with it at Birmingham during that year. We jumped in full time from 2021 where we did a lot of learning, picked up a few heat wins, and learned about the car. Then we built on those successes in 2022 - winning a few titles and finishing 3rd in the points over all.
